

RADIATORS CATALOGUE
2022

EN

Fondital is the first manufacturer of die-cast aluminium radiators worldwide as well as the international leader in heating systems.

This is the result of the focus on sustainable innovation in R&D, production renewal related to study of the products, the constant development and training of human resources and the attention to well-being of its employees.

Fondital establishes with its clients strategic partnerships that go beyond a simple supplier-client relationship, but are based on information sharing and customer orientation, maintaining focus on environmental sustainability.

VISION

We want to be an innovative company in the production of efficient and sustainable products, creating strong partnerships with our stakeholders, enhancing our local roots to be a global reference.

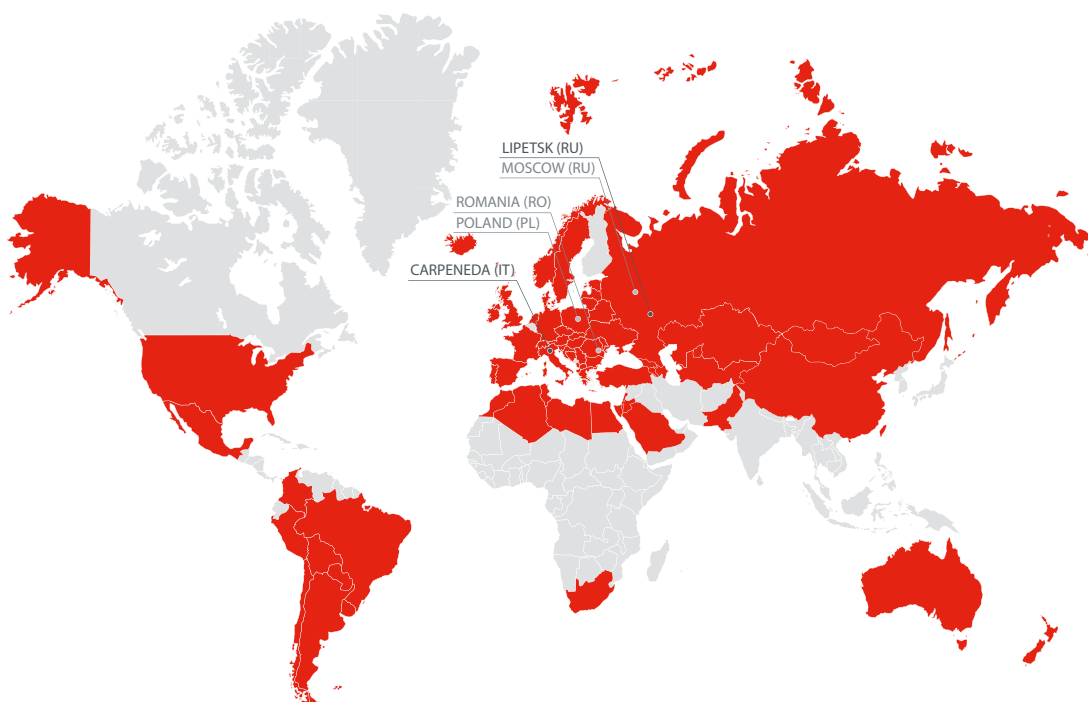

MISSION

Our mission is to produce heating systems and structural castings for the automotive sector, manufacturing high-quality products using the latest industrial technologies. We are committed to operating efficiently, minimising our energy consumption and promoting sustainable processes that respect the environment. We also want to be a centre of expertise and added value for the territory in which we operate.

FONDITAL WORLDWIDE

Fondital is market leader internationally. Multilingual staff and representation offices assure a constant presence on the global market, as evidence of its customer oriented vision. Fondital is constantly growing,

thanks to its ability to interpret customer needs and changes, and to the ability to constantly adapt its supply to the new end market needs with process and product innovations.

■ Active markets

FONDITAL AND BIM: INNOVATION IN PROJECT DESIGN

The entire catalogue of radiators and boilers has been added to BIMObject, the world's largest platform of BIM content.

Therefore, you can download the product files and insert them into the desired project by directly accessing all the specific and detailed information for each prototype.

bimobject[®]

Download the Fondital products from www.bimobject.com/en/fondital

PAINTING AND FINISHING PHASES

The painting process of Fondital radiators was developed in detail with the aim of ensuring an exemplary final result in terms of both aesthetic look and metal protection.

Painting is crucial to protect the metal from the corrosion that could be triggered by particles in the air of the room where the radiator is installed.

With the aim to obtain flawless results, Fondital relies on a process including two coating phases: the first

one is an anaphoretic coating dip and is essential for metal protection, while the second one is carried out by spraying and increases the protection degree, lending the product the desired finish and look.

SYMBOLS

LOW THERMAL INERTIA

The low thermal inertia proper of aluminum, makes the Fondital Radiators the perfect heating body to achieve an installation capable of giving a quick and precise response to temperature variations in the room. This aspect, best highlighted in low temperature installations, is reflected in a better comfort and considerable savings both energetic and economic.

LOW WATER CONSUMPTION

Compared with steel or iron radiators, Fondital's aluminum radiators stand out for a lower water content. This characteristic allows the installation to reach the desired temperature quicker using a lower quantity of combustible at the same time, resulting once again in an energetic and economic saving for the user.

VERSATILITY

The technical properties of aluminum, make Fondital radiators perfectly compatible with all recent technologies in heating production, as condensing boilers and heat pumps, proving to be the perfect solution both in replacements and new buildings.

EASY TO STOCK AND INSTALL

Fondital radiators, assemblable at will based on different demands, allow you to have a more functional warehouse, in terms of number of section for battery. Furthermore, in case you need to adjust the energetic demand of a space, you'd be able to simply add or remove aluminum sections without any intrusive renovation work. Moreover, aluminum's lightweight allows an easier handling and installation of the radiator.

100% MADE IN ITALY QUALITY

Fondital manufactures its radiators in Italy, using just certificated raw materials. The aluminum used to create the radiators is provided directly in liquid state by Raffmetal, and respects the UNI EN 1676:1998 European legislations, with values of the chemical composition specific of EN AB 46100 and EN AB 46000 alloys.

CORROSION RESISTANCE

Durability tested at 200 hours in a saline environment, twice as long as required by UNI EN 442.

100% RECYCLABLE ECO-FRIENDLY PRODUCT

The aluminum used to produce Fondital's radiators is 100% recycled and 100% recyclable itself. This is the only possible way to provide to our customers a totally eco-friendly product, made in complete respect of the environment.

DOUBLE PAINTING: ANAPHORESIS + EPOXY POWDERS

The signature look of Fondital's radiators is made possible by a double painting process that ensures the brightness and integrity of the radiator through time. In detail, applying the first coating of anaphoretic painting ensures a better grip throughout the surface of the radiator, making its quality and color unalterable. The second epoxy powder coating gives the standard white RAL 9010 color, making every single section the same shade and brightness, ensuring a perfect match even when assembling sections from different batteries.

WORKING PRESSURE

Fondital's radiators are internationally thought and able to adapt to every market, this is reflected in their operating characteristics: Max working pressure 16 bar, testing pressure of 24 bar on 100% of production, burst pressure reached in laboratory of 60 bar .

WARRANTY

Using certificated aluminum alloys and the innovative production and control process that Fondital operates, allow us to offer a 10 years warranty on die cast and home-furnishing radiators, extending up to 20 years for the models treated with the anti-corrosion system Aleternum, and 12-15 years for design radiators.

PATENTS

Standing out among the numerous international patents that Fondital's products possess, the new thermoelectric joining technology, that makes our radiators even more resistant, better looking and ecofriendly, and the anti-corrosion internal treatment Aleternum, that ensures a perfect functioning in a wider water pH range, compared with the one of untreated aluminum or steel.

BOTTOM CONNECTION

An installation kit is available to connect the radiator in systems with hydraulic connections from the bottom, according to standard, at a distance of 50 mm of steel plate radiators. The kit includes an integral valve with thermostat option.

RADIATOR WITH BOTTOM CONNECTION

Low thermal inertia

Low water content

Bottom connection

Easy to stock and install

16
bar

Maximum working pressure

Exclusive patent

Radiator with bottom connection is made of:

- standard composition (A)
- single section with right (B) or left (C) bottom connection
- valve (D)

The three articles need to be ordered separately and assembled by the installer.

For the codes, see the following page.

All models are guaranteed **10 years** from installation date on manufacturing faults, provided that the installation has been performed in compliance with the current norms and respecting the instructions relating to the installation, the correct use and the correct maintenance as illustrated on this catalogue.

Advantages of aluminium

- Lightweight radiator
- Modern and appealing design
- 100% recyclable
- Great thermal conductor

RADIATOR SECTION

Advantages of steel

- High resistance to corrosion
- Maximum working pressure 40 bar
- Bursting pressure 120 bar
- Radiator maximum lifetime: 30 years
- Possible use of different vector fluids as water, oil, antifreeze liquid and steam

Standard supply	500: 6, 8, 10, 12 sections
Colours	RAL 9010 White
Maximum working pressure	40 bar

Item	Description	Code
	A 72 1/2" Plug/Adapters/Brackets kit, colour white (Rough brackets, not painted): 1 Bleed valve 1/2"; 1 Rh blanking plug; 1 Lh blanking plug; 2 Rh adapters 1/2"; 2 Lh adapters 1/2"; 4 O-ring seals; 2 Supporting brackets	550118
	A 73 3/4" Plug/Adapters/Brackets kit, colour white (Rough brackets, not painted): 1 Bleed valve 3/4"; 1 Rh blanking plug; 1 Lh blanking plug; 2 Rh adapters 3/4"; 2 Lh adapters 3/4"; 4 O-ring seals; 2 Supporting brackets	550119
	A 30/1 Rubber lockshield plug (water diaphragm)	521011
	A 32/1 O-ring seal for nipples, plugs and adapters	530102
	A 33/1 Nipple for home furnishing radiators	521012
	A 36/4 4 Element towel rail - Colour: White RAL 9010	570014
	A 36/5 5 Element towel rail - Colour: White RAL 9010	570024
	A 36/6 6 Element towel rail - Colour: White RAL 9010	570124

BLACK COFFEE TEXTURED MATT

PEARL PEARLED

ARDESIA TEXTURED MATT

Low thermal inertia

Low water content

Versatility

Easy to stock and install

16
bar

Maximum working pressure

Available in 3 colors

CE₀₅

Standard supply	3, 4, 5, 6 sections
Colours	Ardesia textured matt Black coffee textured matt Pearl pearled
Maximum working pressure	16 bar
Test pressure	24 bar
Included in the package	Water diaphragm (retainer cap)

Combinable with the models
Blitz Super B4 coloured, see p. 18

All models **Garda 5/90** are guaranteed **10 years** from installation date on manufacturing faults, provided that the installation has been performed in compliance with the current norms and respecting the instructions relating to the installation, the correct use and the correct maintenance as illustrated on this catalogue.

Radiator Mood: with decoration

The Mood model with supporting feet is supplied with centre distances from 1000 to 2000 mm.

The supporting feet for this model only have an aesthetic function. The radiator must be secured to the wall with brackets.

All models **Mood** are guaranteed **15 years** from installation date on manufacturing faults, provided that the installation has been performed in compliance with the current norms and respecting the instructions relating to the installation, the correct use and the correct maintenance as illustrated on this catalogue.

* The height of the radiator with supporting feet is 54 mm higher than that indicated in the table.

Maximum working pressure: 1600 kpa (16 bar) Maximum working temperature: 120 °C

Characteristic equation of the model $\Phi = Km \Delta T^n$

The thermal efficiency values shown comply with the European Standard EN 442-1:2014 and are certified by the MRT Lab of the Milan Polytechnic, notified body N°1695.

CODE OBTAINING EXAMPLE

Mood radiator 600 from 10 sections gloss White colour
Ex: **EA10C0 + 04 + 10**

Mood radiator 600 from 12 sections gloss Ardesia colour.
Ex: **EA10C0 + 2B + 12**

To obtain the radiator code, it is necessary to add the code to the four final digits relating to the colour and number of elements.

Maximum working pressure: 1600 kpa (16 bar) Maximum working temperature: 120 °C

Characteristic equation of the model $\Phi = Km \Delta T^n$

The thermal efficiency values shown comply with the European Standard EN 442-1:2014 and are certified by the MRT Lab of the Milan Polytechnic, notified body N°1695.

Item	Description	Code
	- Mounting kit - Standard configuration	550144
	A 80 The radiator fixing kit includes: 2 Rh G 1/2" adapters; 2 Lh G 1/2" adapters, galvanized and painted; 4 sealing gaskets; 1 G 1/2" manual bleed valve with seal; 1 G 1/2" blind plug with seal	550103
	A 2/1 RH/LH G 1" Nipple	510011
	A 10/1 1" Seals for nipples (without asbestos)	530105

ACCESSORIES ON REQUEST

Item		Description	Code
	A 1/1	Rh 1"G automatic air-purging valve. Chromed (always to be installed with the vent in upward position)	520201
		Lh 1"G automatic air-purging valve. Chromed (always to be installed with the vent in upward position)	520202
	A 4/1	Rh G 1" closing plug, galvanized and painted	525014
		Lh G 1" closing plug, galvanized and painted	525114
	A 6/1	Rh adapter 3/8 - Colour: White	526014
		Lh adapter 3/8 - Colour: White	526114
		Rh adapter 1/2 - Colour: White	526214
		Lh adapter 1/2 - Colour: White	526314
		Rh adapter 3/4 - Colour: White	526414
		Lh adapter 3/4 - Colour: White	526514
	A 8/1	Rh 1/4 valve plug - Colour: White	525214
		Lh 1/4 valve plug - Colour: White	525314
		Rh 1/8 valve plug - Colour: White	525414
		Lh 1/8 valve plug - Colour: White	525514
	A 13	Retouch spray 400 ml - Colour: White RAL 9010	540024
	A 16	175 mm Wall anchor bracket	550020
	A 18	Rh bracket to be screwed on to the wall	550035
		Lh bracket to be screwed on to the wall	550036
	A 26/1	Nipple wrench 1"G	550090
	A 27	Nipple metal wrench 1" (100 cm) without lever	550093
	-	Nipple metal wrench kit 1" and 3/4" (50 cm) with lever and plastic wrench for plugs	550092
	A 40/2	Plastic wrench	560257
	A 52	G 1/2" air valve, chromed	520203
	-	1/2" Blind plug	525602

eCool ED	page 88
eGarda	page 90

eBlitz Wi-Fi

THERMODYNAMIC FLUID FILLED ELECTRIC RADIATOR

- ▶ Radiator manageable remotely via Android and Apple smartphones by downloading the Domus One App
- ▶ Compatible with Alexa
- ▶ Aluminium alloy body:
 - quickly reaches the desired temperature
- ▶ Backlight LCD interface incorporated
- ▶ NTC temperature probe and electronic temperature regulation
- ▶ In order to optimise consumption, the radiator provides:
 - Daily and weekly programming with Adaptive Start Control
 - Open window detection function
 - Consumption display
- ▶ Safety:
 - Keyboard lock
 - Built-in ON / OFF switch
 - Power reserve >2h
- ▶ Fixing system included

CLASSE II

Double isolation

All models eBlitz Wi-Fi are guaranteed **2 years** for electrical components, **10 years** on aluminium body from the installation date against manufacturing defects.

The right side houses the new backlight adjustment and control system with digital display and easy-to-reach buttons regardless of installation type.

Power wire:
 - Phase
 - Neutral
 - Pilot wire

DISCOVER THE DOMUS ONE APP!

Download the App from Google Play or the App Store. You will be able to control the operation of your heaters remotely, optimizing consumption and achieving maximum comfort.

MODE

- ⌚ Temporary (Boost)
- 👤 Manual (Simple)
- 🕒 Program

OPEN WINDOW DETECTION

By identifying an open window in the room, the radiator turns off automatically, avoiding energy wastage

ADAPTIVE START CONTROL

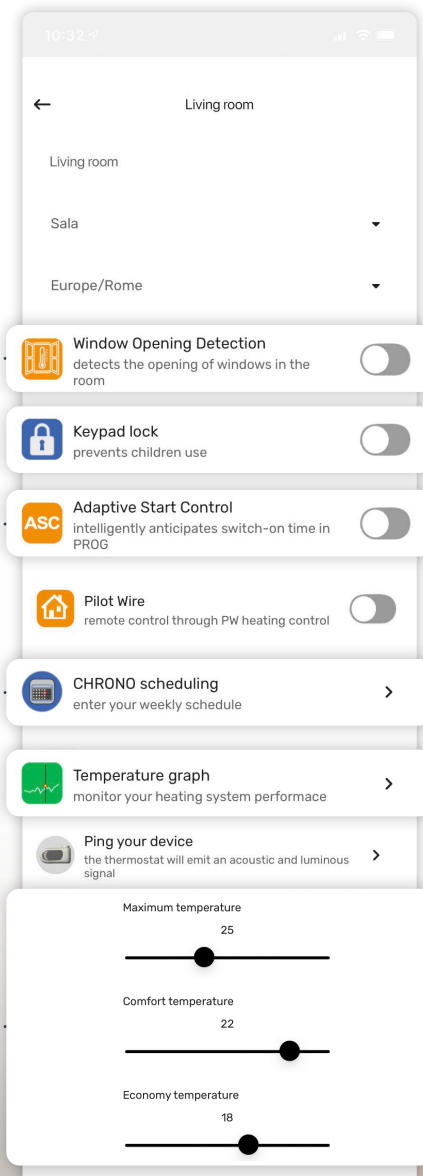

When in Program mode, this smart function will start the radiator at the perfect time based on the current room temperature

PROGRAM

Easily set a 24/7 heating schedule for your radiators

TEMPERATURES SET-UP

Customise the Max, Comfort and Eco temperatures

SECURITY LOCK

Lock and unlock the radiators remotely to prevent tampering and assure children's safety

TEMPERATURES MONITORING

Monitor the room temperature trend thanks to real-time charts

GROUPS OF DEVICES

Arrange the radiators into groups and control multiple heaters at the same time

eBlitz Core

CERAMIC CORE ELECTRIC RADIATOR

- ▶ **Aluminium alloy body:**

eCool ED

ELECTRIC TOWEL RADIATOR WITH DIGITAL CONTROL

- ▶ Aluminium alloy body: with low thermal inertia
- ▶ LCD backlight interface
- ▶ Daily and weekly programming options
- ▶ Open window detection function
- ▶ Child safety lock
- ▶ Fixing system included
- ▶ Schuko plug
- ▶ Anticorrosion internal treatment
Alaternum provided

All models **eCool ED** are guaranteed **2 years** for electrical components, **5 years** on aluminium body from the installation date against manufacturing defects.

UK or Schuko plug available

eGarda

FLUID FILLED ELECTRIC RADIATORS

- ▶ **Aluminium alloy body:**
 - quickly reaches the desired temperature
- ▶ **Colours: White RAL 9010 and Anthracite grey**
- ▶ **Interface with touch radio control**
- ▶ **NTC temperature probe and electronic temperature regulation**
- ▶ **In order to optimise consumption, the radiator provides:**
 - Daily and weekly programming options
 - Open window detection function
 - Consumption display
- ▶ **Safety:**
 - Remote control lock

All models **eGarda** are guaranteed **2 years** for electrical components, **5 years** on aluminium body from the installation date against manufacturing defects.

CONVECTIVE GAS STOVES

Gazelle Evo

page 94

- ▶ **Seasonal energy efficiency class A**
- ▶ **Heat exchanger body made of die-cast aluminium with heat reducer**
- ▶ **User interface with encoder, four buttons, large and backlit LC display**
- ▶ **Premix burner with electronic ignition**
- ▶ **Fans with brushless motor and high efficiency**
- ▶ **Maximum power consumption $\leq 30W$**
- ▶ **Possibility to connect a remote controller (optional)**
- ▶ **Temperature probe complementary (optional)**

Available in the following models:
3000 - 5000 - 7000

EXAMPLES OF PIPING APPLICATION FOR AIR INTAKE AND FLUE GAS OUTLET

TYPE C 13

TYPE C 53

TYPE C 53

WALL FIXING SYSTEM WITH BRACKET FOR AIR INTAKE AND FLUE GAS OUTLET (SOME EXAMPLES)

TYPE C 53

TYPE C 53

The given examples are purely indicative.

Note: Properly insulate the flue gas outlets and install a condensate drain where needed.

Length of the pipes for air intake and flue gas outlet

The maximum permissible length of the pipes depends of the load loss of the individual parts of the system installed to create the air intake and flue gas outlet of the machine.

The sum of the load loss of each part, based on the figures indicated in table 2 and 3, must not exceed the value of the "Maximum length permitted". The sum must include both the air intake as the flue gas outlet pipes and changes according the diameter of the pipes used (35 mm or 60 mm).

Tab. 3

A = air intake

F = flue gas outlet

CALCULATION EXAMPLE

With pipe diameter of 35 mm e 60 mm (apply the load loss indicated in table 3)

Gazelle EVO 5000

Split air intake and flue gas outlet pipes Ø 35 mm and Ø 60 mm

Direct air intake behind the appliance

Roof flue gas outlet with pipe length 3 meters

Maximum length allowed: 100 meters

Air intake load loss

Adapter for split flue gas outlet (semicircle / Ø 35 mm): 0,5 m

Ø 35 mm double pipe length 30 cm: $10 \times 0,30 \text{ m} = 3,0 \text{ m}$

Single wall terminal for Ø 35 mm: 0,0 m

Total air intake load loss: 3,5 m

Flue gas outlet load loss

Adapter for split flue gas outlet (semicircle / Ø 35 mm): 0,5 m

Ø 35 mm double pipe length 35 cm: $20,5 \times 0,35 \text{ m} = 7,2 \text{ m}$

Ø 35 mm, 90° F/F condensate drain for vertical pipes: 21,0 m

Ø 60 mm ÷ Ø 35 mm F/M adapter: 8,5 m

Ø 60 mm pipe length 1 m M/F x 3 : $3 \times 1 \text{ m} = 3,0 \text{ m}$

Ø 60 mm upright flue gas terminal, F : 3,0 m

Total flue gas outlet loss: 43,2 m

Total (air intake + outlet): $3,5 \text{ m} + 43,2 \text{ m} = 46,7 \text{ m}$ $46,7 \text{ m} < 100 \text{ m} \rightarrow$ ALLOWED SOLUTION

Aleternum[®]

Anti-corrosion treatment for radiators

Aleternum[®] internal coating by **Fondital**

Corrosion is the primary cause of malfunctions in heating systems. Not only does it deteriorate the components of the system, but over the years corrosion significantly reduces efficiency, increasing consumption and, as a result, operating costs.

For example, corrosion in a heating system containing cast iron or steel radiators produces a sludge that accumulates at the bottom of the radiators, obstructing the radiators themselves and the pipes, resulting in a partial or total loss in thermal performance and uneven heat distribution.

In conventional aluminium radiators, corrosion produces gas pockets which prevent the radiator from heating evenly and may limit thermal performance.

To stop corrosion even before it starts, Fondital has developed Aleternum[®], an exclusive resin-based internal coating to protect the radiator water chamber.

Aleternum[®] by Fondital brings the heating system into a new era, in which total* protection is a guarantee of safety and high efficiency. Your heating system will always be as good as new!

WHAT IS CORROSION?

It is the chemical and physical interaction between a metal and a water-based medium, which causes changes in the properties of the metal and which often leads to a loss in the functionality of the metal itself, of the medium or of the system consisting of these two elements.

Metal + Water + Oxidant = Corrosion

Depending on the part of the metal affected, corrosion is classified as follows:

- diffused corrosion (or generalised corrosion): if the entire surface of the metal is affected by corrosion;
- uniform corrosion: if the entire surface of the metal is affected by corrosion and the effects of corrosion are equal over the entire surface;
- localised corrosion: where only certain areas of the metal are affected by corrosion. There are numerous different patterns of localised corrosion, among which: ulcers, craters, cavities, pin holes and cracks.

plan view			profile view
	Uniform Corrosion – generalised attack		
	Uniform Corrosion – uniform attack		
	Localised Corrosion		
	Pitting	craters	
		pin holes	
		cavities	
	Stress corrosion cracking (SCC)	Simple cracks	
		Ramified cracks	
	Corrosion - erosion		

➤ The complete anti-corrosion treatment*

➤ Ideal for a broad ph spectrum

Conventional aluminium radiators require pH levels between 7 and 8. The new coating eliminates this limitation, allowing aluminium radiators with the Aleternum coating to operate at a wider pH range than both untreated aluminium and steel (which is subject to corrosive attack at pH levels below 8). Aleternum® radiators by Fondital may be used in heating systems with high or potentially high pH levels.

➤ No gas pocket formation (no gas)

➤ 100% Aluminium - 100% recyclable

➤ Burst pressure up to 60 bar - ideal for multi-storey buildings

➤ Will not become obstructed - no cold spots

➤ Light and easy to install

➤ May be installed in mixed heating systems

➤ Extended warranty up to 20 years.

➤ Better euro/watt ratio than steel and bimetal radiators

➤ Patented system

* Anticorrosive characteristics are ensured if the product is installed in a closed-circuit heating installation, in which all the cleaning and water treatment operations have to be made according to installation standards specific for closed circuit heating installations.

THERMOELECTRICALLY-WELDED CAP

Thermoelectric process, a PATENT PENDING technology, ensures a stable joint between the aluminium die-cast section and its base. Metal in the joint area is absolutely uniform and the two components are perfectly integrated into each other. Thermoelectric joining

technology is carried out at controlled temperatures that prevent spatter and porosity. The result is a radiator that is as solid as a 100% single piece in aluminium, even more sturdy and reliable than ever.

TRADITIONAL CAP

THERMOELECTRICALLY-WELDED CAP

- ✓ NO DIRT ACCUMULATIONS
- ✓ NO WELDING RESIDUES
- ✓ EVEN BETTER AESTHETICS
- ✓ NO GASKETS
- ✓ ENTIRELY IN ALUMINIUM
- ✓ INTERNATIONAL PATENT
- ✓ 100% ALUMINIUM

RADIATOR SIZING AND INSTALLATION

To correctly determine the heat output of the radiators to be installed, you must comply with the rules in force..

To determine the number of sections required for each radiator, you must remember that their nominal heat output is associated with a ΔT (difference between the average water temperature and ambient temperature) of 50 K or of 30 K.

It is therefore advisable to ensure a ΔT of less than 50 K by decreasing the water outlet temperature (for example, a ΔT of 40 to 30 K). This will ensure energy savings as well as increase the degree of comfort.

The radiator heat output for different ΔT values is calculated using the formula: $\Phi = Km \times \Delta T^n$

The radiator heat output for different ΔT values is calculated using the formula:

Calidor Super B4 500/100 radiator with water temperature: inlet 60 °C, outlet 44 °C and ambient temperature of 20 °C.

$\Delta T = (\text{inlet water temperature} + \text{outlet water temperature}) / 2 - \text{ambient temperature} = (60 + 44) / 2 - 20 = 32 \text{ K}$.

$\Phi (32K) = Km \times \Delta T^n = 0,7991 \times (32)^{1,2890} = 69,62 \text{ W}$

When determining the number of sections, remember that in the case of installations with water inlet and outlet at the base or installations with one-way or two-way valve, heat output may decrease by up to 10÷12% and 20% respectively, due to the particular water distribution in the radiators.

If the radiator is installed under shelves, in niches or - worse - in the event of radiator covers, heat output may decrease by around 10-12 %.

RADIATOR INSTALLATION, USE AND MAINTENANCE

The heating systems must be designed, installed, operated and maintained according to the rules in force.

In particular, remember the following during installation:

- The radiators may be used with water and steam systems (max temperature of 120°C);
- the maximum working pressure for die-cast radiators is 16 bar (1600 kPa);
- The radiators must be installed according to the minimum permitted distances: 12 cm above the floor, 2÷5 cm from the wall behind, 10 cm from any niches or shelves;
- If the wall at the back is not sufficiently insulated, fit any additional insulation to minimize dispersion of heat out through the wall;
- Each radiator must be fitted with a vent valve, preferably an automatic one (especially if the radiator has to be isolated from the system);
- The water must have a pH of 7 or 8 (between 5 and 10 only for the model Aleternum) and must not have any properties that can corrode metal in general. As regards treating water in domestic heating systems, it is advisable to use specific products that are suitable for multimetal plants, in order to optimize performance and safety, preserve these conditions over time, ensure regular operation of auxiliary equipment as well, and minimize energy consumption, in compliance with the applicable laws and standards. Compliance with this standard is a legal requirement. Use specific products suitable for multi-metal systems such as, for example, CILLIT HS 23 Combi, SENTINEL X 100 or FERNOX F1.
- to tighten the nipples apply a tightening torque between 50 and 80 Nm. Do not exceed 80 Nm.

When using the radiator, remember:

- Never use abrasive products to clean the surfaces;
- Do not use humidifiers in porous materials such as terracotta;
- Avoid fully closing the valve and thereby isolating the radiator from the system;
- If the radiator requires excessive purging, this means there is a fault with the heating system. Contact a qualified technician or call the manufacturer's technical office directly.

The manufacturer reserves the right to implement modifications without notice.
